

Antatex **HEALD FRAMES**
FOR AIRJET WEAVING MACHINES

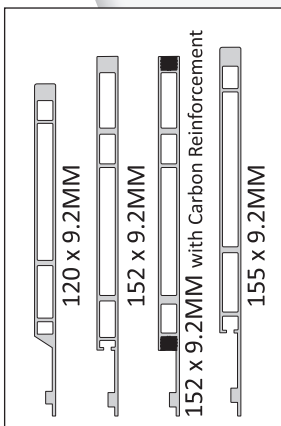

ANTATEX HEALD FRAMES SUITABLE FOR AIRJET WEAVING MACHINES WITH DRC10 CONNECTORS.

Strong frame staves

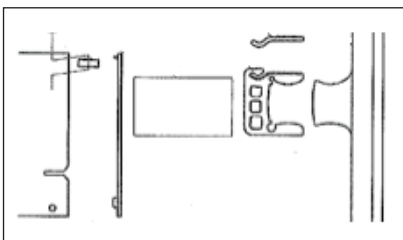

Antatex heald frames suitable for airjet weaving machines are made of aluminium staves that are of high quality and are strong which is suitable for quality weaving. We use the best quality aluminium suitable for high quality weaving.

We can provide staves in sizes of 120 x 9mm, 152 x 9mm and 155 x 9mm.

Strong Lateral supports

Antatex heald frames suitable for rapier weaving looms are equipped with strong aluminium lateral supports in different shapes such as U shaped, solid type and others as per the requirements of various airjet looms.

Reliable corner connections

Antatex heald frames are equipped with performance proven corner connections. They are made of special materials that absorb vibrations at high speeds and prevent the lateral supports to create a play in the running of the frame. They prevent the lateral supports to wear out easily resulting in a long life of the lateral supports.

ANTATEX HEALD FRAMES SUITABLE FOR AIRJET WEAVING MACHINES WITH DRC30 CONNECTORS

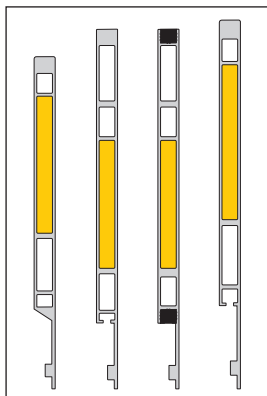

Guides

Antatex heald frames are equipped with fixed type glued-on high quality wooden guides.

Heald Carrying Rods

Antatex heald frames are equipped with high quality stainless steel heald carrying rods in all forms J, C and O type.

Noise Abatement

Antatex heald frames are filled with a special insulation in the aluminium profiles as a basic feature to reduce the noise of the frame while running on the weaving machine.

Heald Frame Connectors

Antatex heald frames are equipped with original heald frame connectors like:
